1310/CWDM MUX/DEMUX (type II) Plug-in Module

1310/CWDM plug-in module is a passive optical multiplexer/demultiplexer designed to add CWDM wavelengths to an existing 1310nm backbone ring. The module multiplexes and demultiplexes a single 1310nm wavelength and four or eight additional CWDM wavelengths in a two-fiber ring network.

This MUX/DEMUX module plugs into one half of a 1RU, 19" rack mount chassis for simple installation and modularity. This Chassis based system offers network equipment manufacturers a more scalable and higher-density solution to add CWDM capability to their existing and new networks with simple pluggable interface.

Finisar’s CWDM product delivers dramatic cost savings to network equipment manufacturers, enabling them to develop metro access systems that are lower in cost, easier to provision and simpler to operate.
